# ABOUT US

THE ARTIHC STUDIO firm was founded in 2018. The Firm was started by two and-made their first project in interior designing.

To us, every client is unique with unique briefs, We derive from the brief and make the space that the client rejoice.

Our approach to design is unique to give a hands on touch to each client making it crafted uniquely for them.'

# JOURNEY SO FAR

"It all started with a plan on wall. which got us here what we are now today. That random floor plan on the wall influenced us to get ourself into Interior Design.
The Journey started with two, made a supportive team, to make a long way further."

# The House of Allay

bengaluru,India

The House of Allay span three levels excluding the ground level, the ground area includes parking space and a small rented residence.The house exterior is mainly combination of dark and white, which gives a bold glance from the abbuting roads.In the first level of this 6,800sft house IncludesHuge meditative living space with an attached powder room, a kitchen and a cozy dining to have a good food with the loved ones. The second level have Clients parents and the guest bedroom also a classic study area with a contemporary touch.The most elegant mono themed master bedroom and a gym spaceare placed on to the third level, and it also includes a wonderful open sitout space which can host a good family brunch gathering and a dinner.

The design taste for the house is inspired from the contemporary style.

The mood board all over the house includes darker grey shades with complimenting raw mahogany woods and balancing whites.The less ornamented and more openess creates a classy and contemporary look

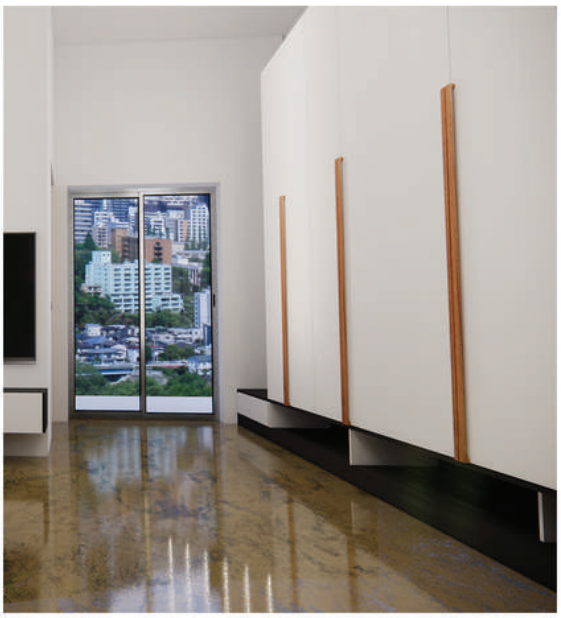
# The House of Allay

bengaluru,India

This parents bedroom design is a very functional and we have created space for easy acces in the room. The room is blended with beige, grey and white mutant colours, the approach is simple and at the same time it adds richness to the room.The bed back has a simple and comfortable upholstery headboard with a provision of niche in the top backed with fluted edge panelling and an elegant painting is hung on the top which altogether draws the attention to that wall.A lounge chair is added further that blends into the space and design. The idea was to create an aesthetic ,simple yet stylish bedroom The space is well designed considering the user, the space is well functional and easy in maintanance for the user. The lighting provision in the room are in different layers for a subtle environment and also for different tasks. .



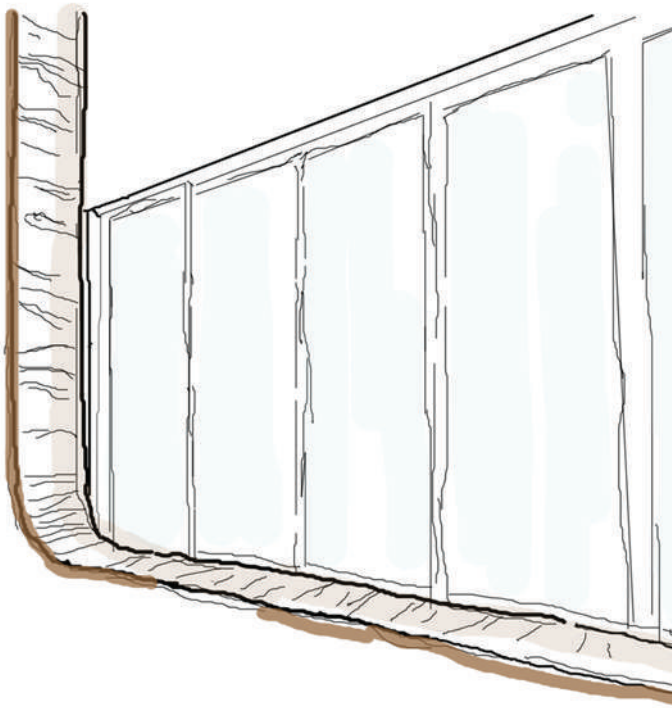
The wall has been elegantly designed, with a minimalistic approach

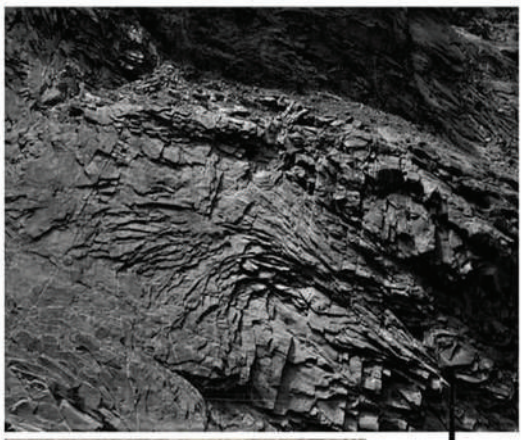
beautiful place to relax and a cozy zone for reading and watching tv as well

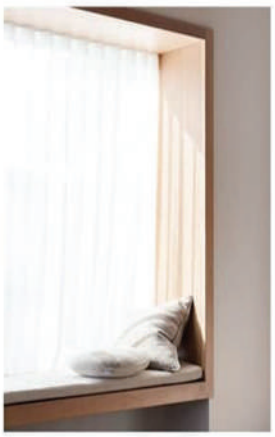
# The House of Allay

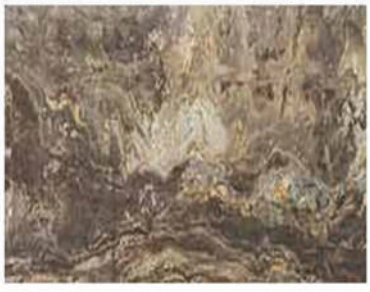
bengaluru,India

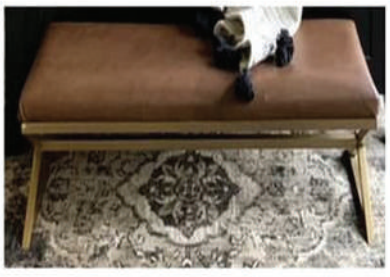
The master bedroom is designed in a very modern approach. The users are a young couple, so we have come up with a industrial approach to the room.The classy bold grey shades and raw wooden elements slates the room into another world. A great low height seating is provided just beside the window to chill and enjoy the beautiful view outside.As soon as we enter into the room our first glance is the window in the opposite, the low height seatingis made in such a way that it not only serves the purpose, but also compliment the industrial theme of the room. The concept of the seating is have an element hanging from the roof, and that is how the design of the seating derived and welded beautifuly in a perfect space.









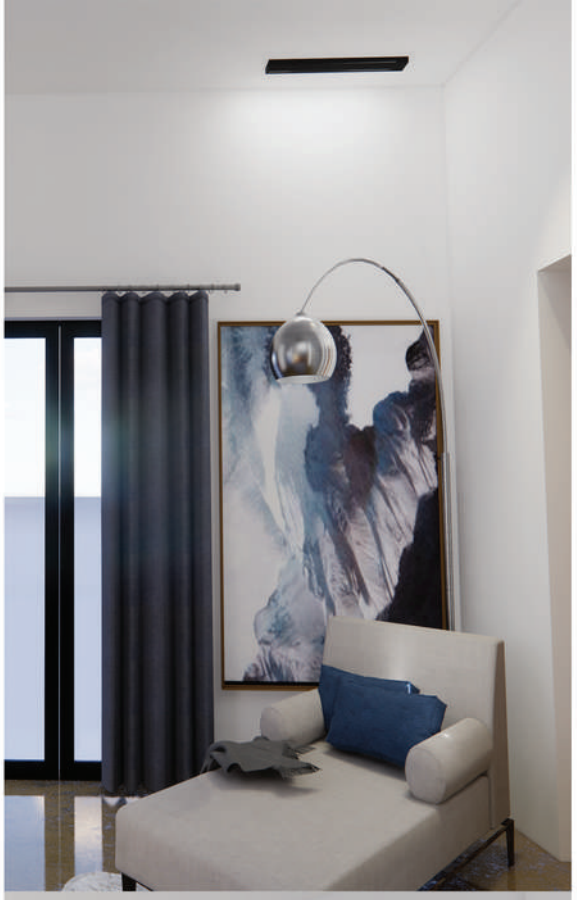


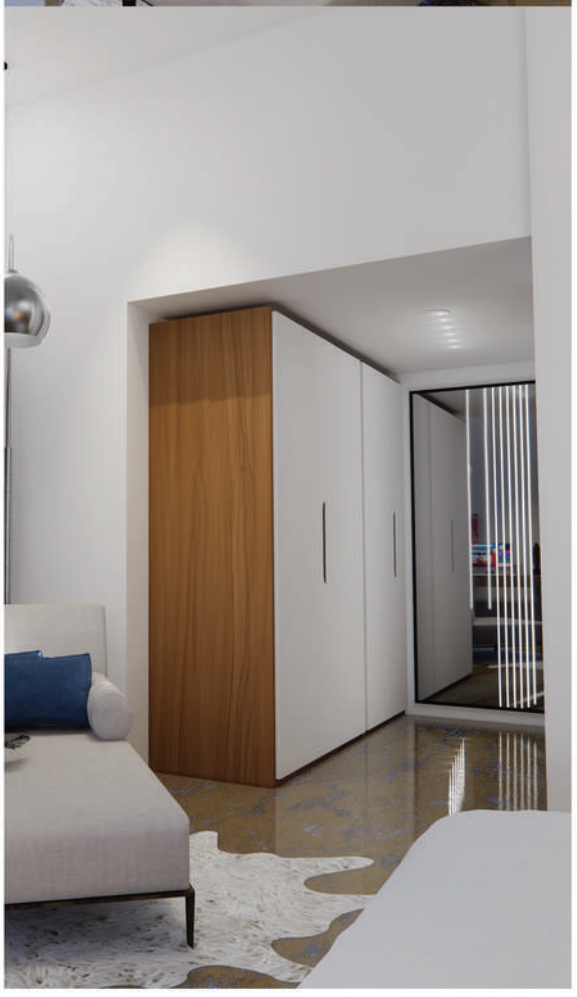
An Eye-catchy stone finish feature is added to the bed back wall Giving a bold industrial character to the space. It is well accommodated with sleek furniture items and whole room is topped with tasteful lighting solutions that highlights every perfect details. A rocky background for the bedroom gives a dramatic appearence under thereceding track lights, and a unique bedside pendant light The ceiling is well crafted to define the design theme and at the same time it is minimalistic.

The wardrobes are modern and visually unobstructive,the translucent shutter gives a sleek look to the space.The combination of wood and grey are blended amazingly in this space.

The guest room is designed in a much immaculate way,with teal shade on to the wall and fluted wooden panel. This colour imbue with calm,soothing and regenerative vibes that sets a relaxing mood to the user.The whole look is capedWith minimal lightning fixtures that is just perfect to intensify beauty of the space. The design of the space is a mix of bohemian and contemporary, a boho space is always considered as welcoming and cheerful because of its enduring use of colour

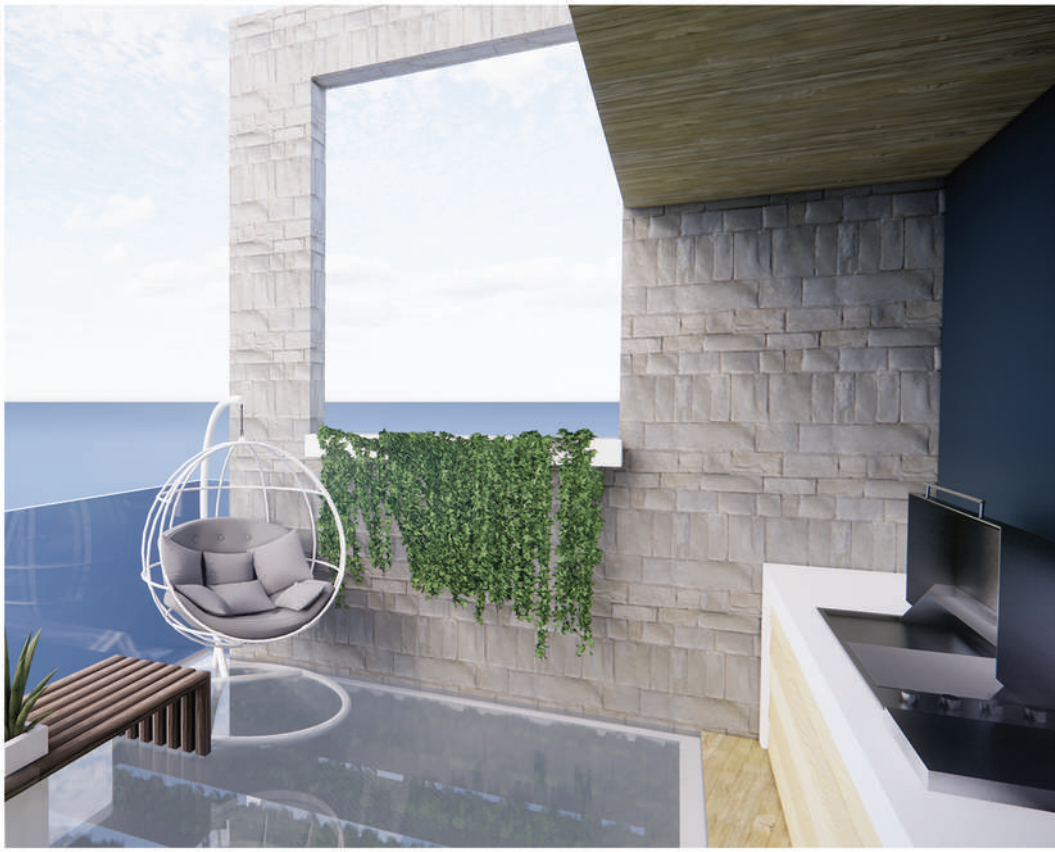
A cozy corner is created with most comfortable lounge chair And lamp beside to it which is Perfect for relaxing and reading a book.To brighten up the space a huge art piece is hung to the wall Which completes the whole space.The furniture in this room are designed in contemporary style with slekk and fine finishing in the combination of white and wood.





The utilization of this small empty space came out magnificiently kink. The space is designed in a simplistic way with more of a functional purpose. The cozy study corner will be the best space in the house to get yourself up on the low-lie days designed in an most efficient way. With sturdy floating shelves displaying accessories ,decors,books,Vase etc.The floating shelves are placed in asymmetric yet in a geometrically pleasing way. A floating study table and a sleek light focused on to it makes the table area itself more appreciable.

This sitout space design is inspired from the classical european architecture.The elements used in the design will reflect the typology of the design theme.The use of rumbled stone on to the bigger facade itself makes the space unique out of all the spaces.The ornamentation of arch and a painting gives the area a different world kind of look, which we were trying to achieve.This sitout area is a chill out area, and also there is a provision for small cooking and barbeque



The extensive use of stone brings out the beauty in the space.It makes the space look natural and creates a great hardscape in the area.A beautiful seating to host a small group of people can be well maintained.We have proposed old street lamps on to the both sides of the wall,it will create a warm abience in the area and

A maze of curves and lines, made out a partiton structure in the living room The structure is also designed as a display unit. The Circular elements have a tropical plant pattern, which makes the room more lively.The wooden finish blends with the greensand gives a natural essence to the space.

# House of Curves

Hyderabad,India

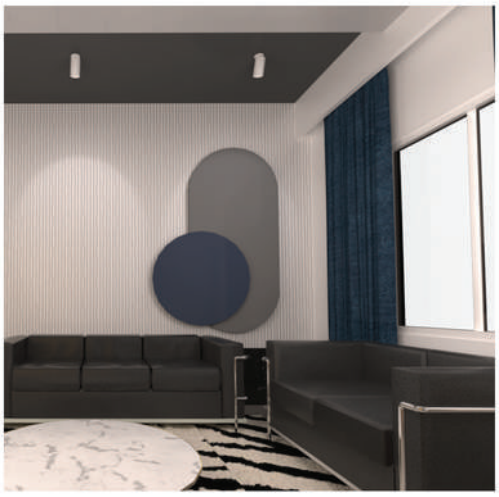
Location: Miyapur Hyderabad

Sft:1350

Type-Residential

Scope-Interior design,

The design is influenced by F..L.Wright Window design pattern, likewise, we usedcurves as a primary element to use in thevarious parts of the house.The design style is a contemporary desi witha colour combinations of Blue and greys.The TV Unit in the Living room is given a single big round structure behind the tv. The circular element itself replicates the theme. A plush of mustard yellow brightens the space and is painted half part of the wall.The combination of gray and yellow are always a go togther



The wardrobe in the master bedroom is a full length sliding wardrobe, the design is subtle to keep the other elements in bedroom a lit.

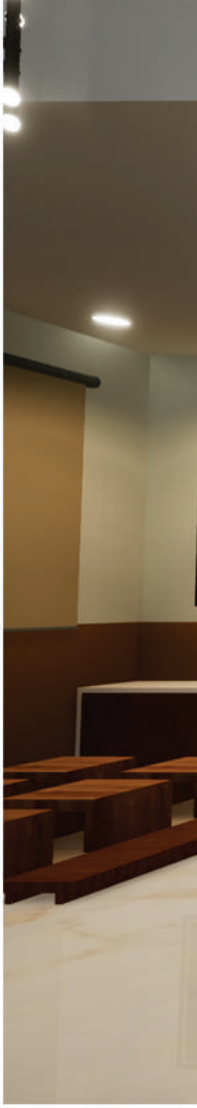
.

The Master bedroom bed back wall is treatedelegantly with fluted panelling, with a brush of pantone blue duco finish on it. The round mirror follows the curves rule we followed in the design, and also it makes the space look more bigger. The combination of white and wood gives a classic look to the wardrobe. We gave a chevron pattern to the one of the wardrobe shutter. The chevron pattern is also used in the otherparts of the

# MONTIQUE

Tirupati,India

This 3bhk is developed with earthy decor palette that includes antique style with modern touch.The space is organised functionally, and with indoor green plants to uplift the contrast.The whole design is crowned with beautiful and sophisticated  lighting solutions that accentuate the interiors with sleek furniture,wall paneling,traditonal dining, receding ceiling strips,matt subtle finish,this place is well designed to accoutre its beauty in its best lighting. The spaces are created particularly according to the clients breif. A traditonal dining space was a requirement, so we created a spacious dining area.The living room has a niche looking into the bedrooms,we made a partition in that area to cover that and at the same time it also works as a display storage



Location: Tirupati
Sft:1650
Type-Residential

Scope-Interior design

The design of the storage partition is inspired from the old indian traditional jarokha patterns

The conceptual image for the pattern we got inspired from to add it to ur display storage. We have merged modern and traditonal pattern together in our project

# FARM BIJOU

Hyderabad,India

The concept of the farm is derived from french architecture. The design defines the simplicty and expose of natural materials.Elements like arches has been used to define sophisticated entries. The essence of greenery can be replenished all over.

The main entrance is defined by two doric coloumn, giving the entrance arched door a grand entry, it also defines the ethnicity of the structure.The exterior walls will be having a stucco finish and a pop blue colours are added to, to define a particular entry or a space.The structure is dived into two zones. The first zone is semi-private, which includes a living space, a kitchen and a huge dining.The secong zone is a private zone with two floors, which includes the bedrooms and entertainment zones.

Location: Hyderabad
Sft:1400
Type-Residential
Scope-Architectural

A gazebo is planned near to the dining and the private zone.The gazebo is provided to have a oudoor dining as well as a sitout to enjoy the beautiful landscape around. The gazebo designed, by using doric coloumns.

The concept of gazebo is to provide a shaded and semi covered gathering space in the site,also we have provided a bar and food counter beside the gazebo for easy serving

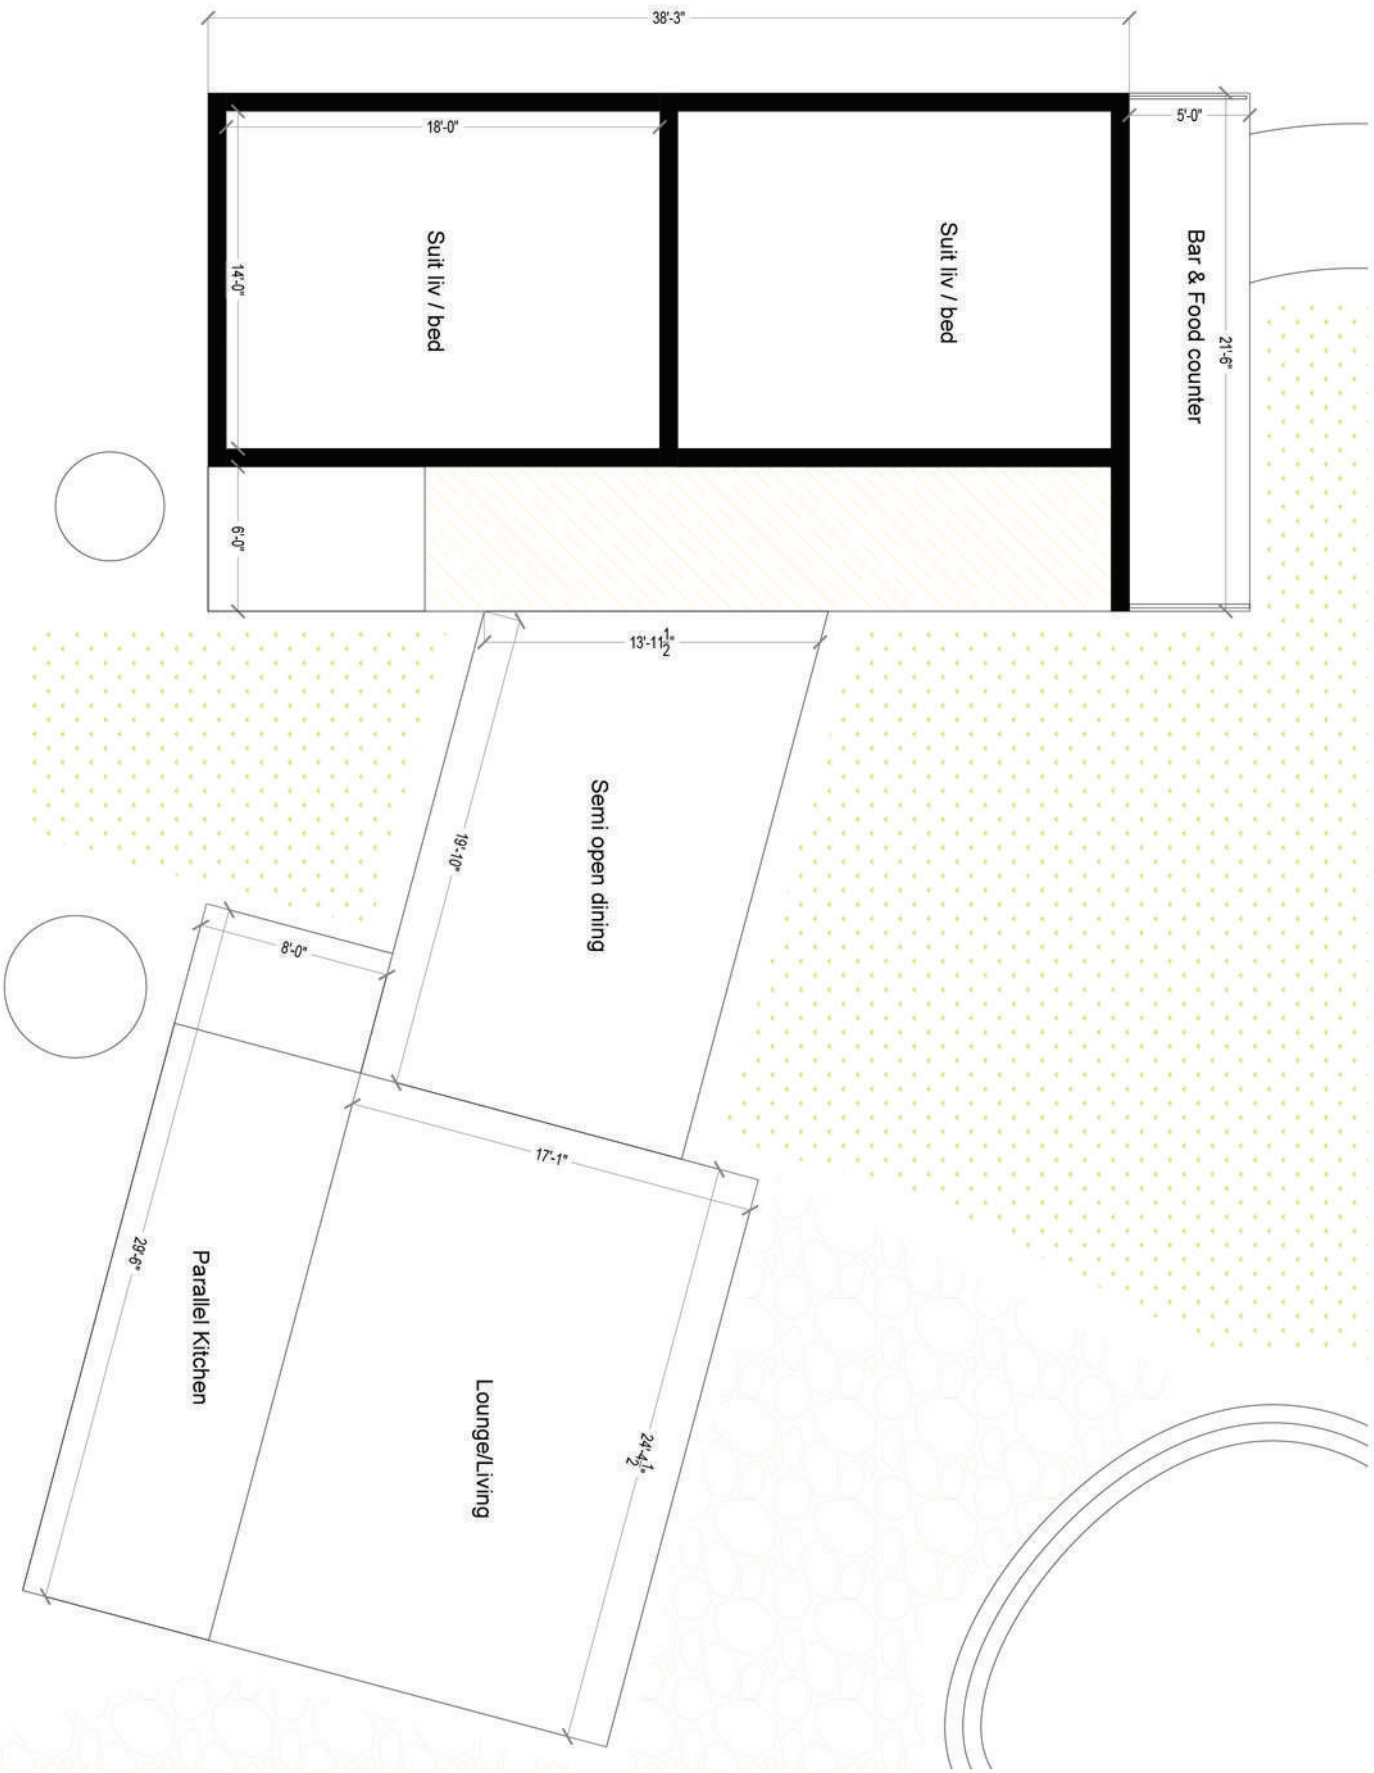
The dining space is having two openings on either sides to have a good lighting and clear view of elegant landspace. The [illegible] also acts as aisle for con[illegible] first zone and the sec[illegible] the farmhouse struct[illegible] pound wall structure is designed for the swimming pool to buffer the space from the main entrance of the site and other open areas.

# FARM BIJOU

Hyderabad,India

The House of Allay span three levels excluding the ground level, the ground area includes parking space and a small rented

The farmhouse is proposed in a beautiful farm layout in hyderabad with great landscape and a small farm field



The planning of the farm house is simplistic and defined spaces, rooms spaciously are created for family gatherings.

Farm Bijou, the idea was conceptualized as an amalgamation of Site and clients requirements.To keep it simple and classy. The elevation is kept simple in white with a offset Of stoned wall in front to add An element of surprise.It is a two storey house with A kitchen,dining,two bedrooms on each floor and a semi opened Space for gym on terrace. This building is a modern structure cornered to a rear end of the plot with a lush green landscape and a pool to a side. In the back a semi private outside seating is provided with a pergola roof

A relaxing pool side with a nice shaded area to chill out.

A semi open dining space to enjoy the landscape around and enjoy meals in the free fresh breeze around

# CERULEAN HOLT

Hyderabad,India

The Cerulean holt is a 3bhk flat with 1400 sqft A pop of cerulean shade is added to the accent wall to bring the dramatic feel into the space.The unusual combination of dark blue and brown makes this room a contemporary heaven. Dining table acts as a partition for formal and informal living space and divides the long rectangle space in perfect segmented areas and is beautified with theatrical suspended lighting.Each and every element in the space is carefully curated and placed to make the room cozier and livable.The colourfull jazz in the room is absolutely welcoming and enjoyable the patterns and type of materials used in this house are variant and unique at its own place.We have bought textures and patterns in the space through fabric, and that is how a cozy environment is created all over the house.The family living space is more casual space to enjoy the evenings and chill outs during the wee hours of the day.

Location: Rajapushpa Regalia,kokapet, Hyderabad

Sft:1400

Type-Residential

Scope-Interior design

The dark and bold ceiling gives an important gesture to the dining area, the lights above the dining are just elegantly beautifying the space

The brown shades are extensively used to create a cozy vibe in the house

The upholstery on the wardrobe will have a thin cushioning on to the shutter and upon that the fabric layer will be laid

The master bedroom shows a softer side of the house.The wardrobes are done completely different here in in this room.We have used a upholstery method to the wardrobe shutters.The pattern on the fabric itself creates a joyfull vibe in the room.Here wardrobe itself acts a s a decorative element in the room. Also a full length upholstery is done onto to the bed back wall,it gives a classy essence to the space A small low height seating is provided in the room to have a small chit chat space or the couple can enjoy there evening coffee together .The flooring of the room enhances the whole beauty of other elements in the room.

And our most favourite part to design the kids bedroom.Here the room is all about the client kiddo favourite.Kids bedrooms are all about creativity,fun, imaginative and wide range of scope. We call this room as a-dino den because of its dino theme. A playful dino themed wallpaper is added to the accent wall to perfectly balance the fun and the dino theme.The entrance oh the roomIs decorated with two large dinosaur images that appears to be welcoming the Kid into the room.The colours are bright and playfull for the kid to love his room. What not we have in the room,just anyone would love to RAWR when they go into this space.

Its a peek-a-boo dinosaur.When you enter through the door,two cute dinosaurs would be peeking at you, and thats where the joy is

# THE OFFICE

Gachibowli,Hyderabad,India

This is proposal for a construction office space located on Third floor The brief was to Make a flexible working space with different cabinets And spaces that are shared in This is a office space located on Third floor of an building.

It is a construction company.The brief was to make a flexible working space with different cabinets and spaces that are shared in common.A sleek discussion table is proposed in the conference room to give the space a modern look.

As per the requirement the space is designed in an antique style with a classical touch. The furniture design is a mix of antique and contemporary style with firm and curvy edges.To bring out the antique style wooden veneer is used and as of for contemporary style classic white shade is used

This is second cabin which is designed in a complete modern approach with minamalistic elements.

# THE AZURE

Hyderabad,India

The theme is to create a simple yet bright interiors with rich dark colours and suitable furnitures.The key thoughts for the design are functionality,effectiveness and sophisticated designs.

The living room is a mixture of dark bold walnut wooden shades and vibrant colours like blue and woods.These colours are off setted with whites and greens to bring in the calmness into the space.

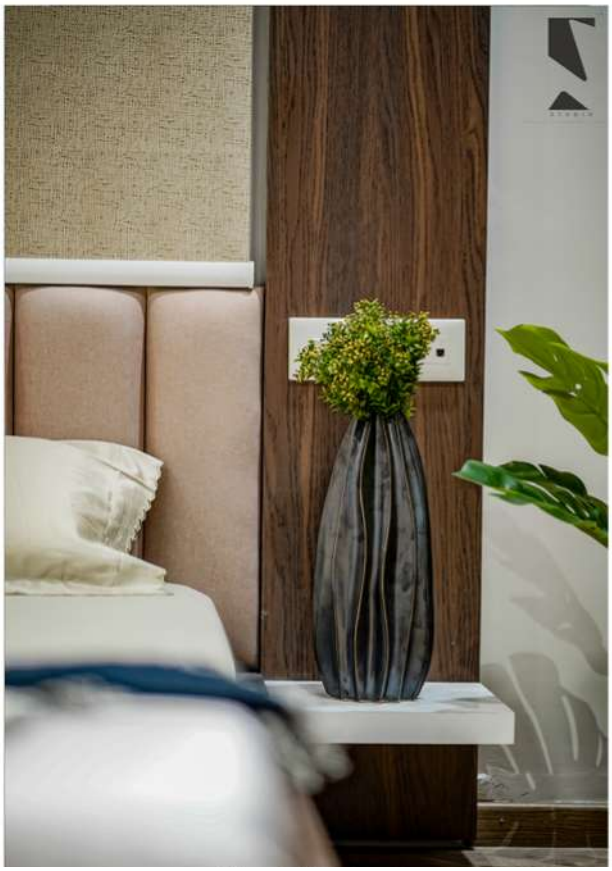
Location: Madinaguda
Hyderabad
Sft:1600
Type-Residential
Scope-Interio Design

Kitchen is visually connected to the drawing and dining area and so it is designed in a blue and simple white minimalistic style and to create a simple practical uncluttered space.

The House of Allay spans three levels excluding the ground level, the ground area includes parking space and a small rented

The master bedroom is designed according to the user and the shades they prefer, to bring in the sense of belonging. The room pallete is mainly wooden flooring,dark walnut veneer finish on wardrobe shutter and also a wooden panelling running over the ceiling from the room entrance to the end and beige shade fabric are deliberately chosen to deliver elegance and warmth to the space.

The geometry is kept simple in the space.The bed is a low height bed to make the room more spacious and clutter free, and the bed is given a floating design to look modern into the space.



An amazing kids bedroom with a great play area just above the bed,It also can be a great relaxing place

A simplae balcony area with a small sitout,and huge collection of plants,Definately a best place to relax
